### TURCO 3518

Material. No. 379177

### CONCENTRATE SOLVENT ADDITIVE FOR MAINTENANCE OF TRANSPO TANKS

#### DESCRIPTION:

TURCO 3518 is a concentrate of the active solvent and corrosion inhibitors used in TURCO TRANSPO. These critical components are depleted by the working of Transpo solutions.

#### USE INSTRUCTIONS:

Transpo consists of a water seal (top) and a non-aqueous solvent layer (bottom). The water seal depth is simply adjusted by addition of tap water. Once this has been completed the difference in height from when the tank was first set up to present day is due to solvent loss. This is made up with the addition of TURCO 3518.

No special instructions are required just carefully pour TURCO 3518 into the tank and it will sink through the water layer and add to the solvent layer. Caution must be taken to avoid splashing. For Transpo Tanks over 400 Litres (2 x 200 Litre drum purchase) HENKEL will offer free testing and advise on the additions necessary to maintain your Transpo tank at optimum working conditions.

#### SAFETY DIRECTIONS:

This product contains a concentrated solvent. Please read the HENKEL MATERIAL SAFETY DATA SHEET before using this product .

Eye protection, solvent resistant gloves and suitable respirator is required when dosing this product.
